

Santa Sabina Center

SAFETY PROTOCOLS

Santa Sabina Center is an intimate retreat space. For the safety and sake of all guests and staff, we continue to maintain safety protocols.

Vaccinations, Boosters & Requirements: While vaccination remains the [best protection](#) against COVID-19-related hospitalization and death, we have revised our protocols to reflect the most recent information from the CDC. Unless directed by the program coordinator or presenter, COVID-19 vaccination is no longer required; however, self-testing as described below will be required of all retreat attendees, staff, leaders, and presenters.

Self-Test Requirement:

- Two antigen tests within 72 hours of arrival;
- Provide proof of negative results to the program coordinator;
- A third test administered on the day of arrival. If the group prefers, it may require this final test to be done on-site before entry into the facility.

Masking: While masking is recommended to help slow the spread of COVID and other respiratory illnesses, currently each presenter and/or group makes its own decision regarding wearing masks.

- **Ventilation/Air Filtration:** We provide special air filtration units with HEPA/virus filters in all interior gathering spaces.
- **Hand Sanitizing:** There are hand sanitizing stations and bottles located throughout the Center.
- **In Case of Illness and/or a Medical Emergency, guests are advised to:**
 - Take care of yourself and others by staying home if you have a fever (99.5 degrees F or higher), shortness of breath, or other COVID-19 symptoms. Stay home if you have been in contact with someone with COVID-19 in the last 14 days.
 - If you experience a medical emergency during your stay, please call 911 immediately. Then, notify your group coordinator who will work with hospitality staff to direct emergency personnel as needed.
 - If you become ill during the retreat, please contact your retreat coordinator and plan to relocate to your home or a local hotel.
 - After seeking medical attention, please follow-up with the Center to let us know how you are doing and provide us with any health information that may affect other guests or staff.
